

David Kazeem - Resume

Projects

TODLR HUB ? Child Financial Education (App Store Link, Playstore Link)

Studied designs made available and implemented key features necessary to the growth of the application.

Synchronized the application with Firebase, making use of local storage (shared preferences) for search and filters.

Handled state management efficiently with the Provider framework.

Coded Shots ? Code snapshot tool (Web link, MacOS DMG)

Developed a macOS and web app using Flutter for capturing beautiful code snippets with native syntax highlighting.

Built a smooth, user-friendly interface without webviews or JavaScript for optimal performance.

Designed the app to streamline the process of sharing code snippets with minimal steps.

Focused on a lightweight, functional tool for developers to capture and share high-quality code visuals.

PAY SCORE ? FinTech Product (Demo Link)

Utilized Flutter to build the ?front-end? financial technology mobile application for Payscore.

Implemented a QR code payment system for fast and secure transfer, receiving, and withdrawal of funds.

Implemented channels for fast and secure transfer, receiving, and withdrawal of funds in Naira.

Handled state management, as well as, REST APIs consumption, efficiently with the Riverpod framework.

MONA ? FinTech Product (Store Link)

Utilized Flutter to build a fintech platform enabling seamless money transfers between Nigerian banks.

Built with modern technologies, ensuring scalability and compliance with Nigerian financial regulations.

Integrates REST APIs and state management solutions for optimized performance and reliability.

Handled state management, as well as, REST APIs consumption, efficiently with the Riverpod framework.

Work Experience

LEAD MOBILE DEVELOPER ? RETROSTACK TECH ? LAGOS August 2022 - July 2023

Developed scalable, highly-optimized, cross-platform front-end mobile application.

Integrated efficient RESTful APIs to seamlessly function with external services and databases.

Optimized code to enhance system reliability and performance.

Contributed to Agile development processes, participating in sprint planning and delivering iterative software updates.

FLUTTER INSTRUCTOR ? HIIT PLC October 2023 ? December 2023

Drafted a curriculum that covers the basics of Flutter and Dart Programming Language.

Instructing and guiding students through hands-on exercises, fostering a deep understanding of Flutter development.

Providing personalized assistance and constructive feedback to ensure students' mastery of Flutter development.

Fostering a positive and inclusive classroom atmosphere, promoting a passion for continuous learning.

FLUTTER DEVELOPER / MOBILE ENGINEER ? TODLR, INC ? DELAWARE, USA.

Actively participating in Agile methodologies, sprint planning and iterative software updates, contributing to the growth of the application.

Maintaining the Todlr Hub ?Parent? application by optimizing already established processes and adding new features.

Presented detailed written reports, each week to upper management alongside my apprentice supervisor.

FLUTTER DEVELOPER / MOBILE ENGINEER ? GFA Technologies ? OGUN. NIGERIA

Led the conversion of an existing web platform to a mobile app using Flutter, enhancing accessibility and user experience.
